SUMMARY

Front-end web developer skilled in HTML, CSS (Tailwind CSS), and JavaScript (React) for building responsive and modern websites. I also have strong UI/UX design skills, creating clean, user-friendly, and visually appealing interfaces. I use Framer Motion for animations and React Router for app-like functionality. Currently learning backend development to become a full-stack developer, and seeking opportunities to apply and grow my skills through freelance projects and internships.

WORK EXPERIENCE

Freelance / Self-Learning Projects (Mrach 2022 - Present)

- Designed and developed 3+ responsive websites (portfolio, online store, service site) using React, Tailwind CSS, and Framer Motion.
- Created custom UIs from scratch, focusing on user-friendly layouts and clean design.
- Improved user experience with animations and mobile-first responsive design.
- Deployed projects on GitHub Pages for live access and testing.

Projects:

Portfolio Website (React, Tailwind CSS)

- Designed and developed a responsive personal portfolio showcasing skills and projects.
- Built interactive components and smooth transitions for professional look.
- [Mahad's Portfolio](#)

Watch Store Business Website (React, Tailwind CSS, Framer Motion)

- Created landing page for an online watch store with engaging product showcase.
- Designed UI layout (colors, typography, responsiveness) and added animations.
- [Watch Store](#)

Business Landing Page (React, Tailwind CSS, Framer Motion)

- Designed and coded a responsive website for repair services with service details and contact section.
- Added simple animations and clean user interface for better usability.
- [Home Appliances Repair](#)
